POSTDOC POSITION IN ORGANIC SYNTHESIS
ONE YEAR CONTRACT

Host laboratory:

ESPCI Paris
Team of Organic Chemistry directed by Prof. Janine COSSY

Recruitment:

A post-doctoral fellow on a 1 year contract

Objective of the internship:

Use of new technics and development of organometallic reactions to access bioactive compounds

Required skills:

The candidate

- must have a PhD (or equivalent experience) in chemistry and have a good background in organic chemistry,
- should have, if possible, experience in enantioselective reactions and/or multistep synthesis of complex molecules,
- must be familiar with the separation techniques, analytical methods (NMR, IR, UV, mass spectrometry ...).
- must be fluent in english, have the ability to work within a team and should have good communication skills

Duration:

One-year contract starting in March/April 2022
